

A LICE POUR-ON FOR LONG-WOOL SHEEP

VANQUISH is an SP pour-on for the control of lice and prevention of flystrike. An ideal emergency lice outbreak treatment

- Alpha-cypermethrin (SP) pour-on for sheep
- Emergency long-wool lice treatment
- 20 weeks lice control
- 22 weeks protection against reinfestation
- 7 day meat withholding period
- Also prevents flystrike for up to 6 weeks

Registered for:

VANQUISH provides 20 weeks lice control and 22 weeks protection against reinfestation. It also prevents flystrike for up to 6 weeks.

VANQUISH is a synthetic pyrethroid (SP) pour-on for sheep, containing the active alpha-cypermethrin. Alpha-cypermethrin kills lice on contact.

VANQUISH is the ideal emergency treatment for lice in long-wool sheep. Tough enough to work in up to 10 months wool growth, VANQUISH is the product to turn to when an unexpected lice 'outbreak' occurs.

Withholding times:

Meat: 7 days

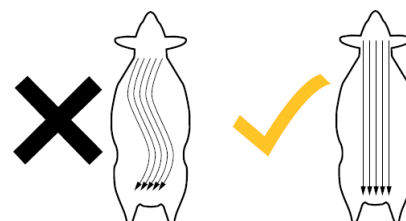

Milk: 35 days

Wool Harvest Interval: 60 days

Application:

Best practice for lice control is off-shears, but COOPERS VANQUISH can be used on all breeds with up to 10 months wool growth.

Apply in a continuous wide band (10-12cm) down the midline from between the ears to the tail using a COOPERS T-bar gun. Ensure equal coverage on either side of the midline.

Dose rate:

The dose rate for lice control using VANQUISH assumes flat comb shearing.

Animal	Wool Growth	Dose
Sheep	0-4 months	10mL
	4-6 months	15mL
	6-10 months	20mL
Lambs	0-2 months	5mL
	2-6 months	10mL
	6-10 months	20mL
