

A LOW-DOSE COMBINATION DRENCH

SCANDA is a white/clear dual combination oral drench for the management of internal parasites in sheep and cattle

- White/clear combination
- Low-dose oral drench
- 1mL/10kg for sheep and cattle
- 10 day meat withholding period
- Available in plain and selenised

Registered for:

SCANDA controls internal parasites in sheep and cattle, including tapeworm in sheep. It is a short-acting white/clear dual combination oral drench.

SCANDA contains the drench actives oxfendazole (white) and levamisole (clear). Oxfendazole is the most potent of the white drenches. Levamisole has retained efficacy against *Cooperia* species, worms that commonly show resistance to other drench families in cattle.

SCANDA is a low-dose formulation in sheep.

SCANDA Selenised aids in the supplementation of selenium, zinc and cobalt.

Withholding times:

Meat: 10 days

Sheep – Milk: 35 days

Cattle – Milk: 144 hours (12 milkings)

Dose rate:

1mL/10kg in sheep and cattle

Liveweight	Doses per pack		
	2.5L	10L	20L
Sheep			
30kg	833	3,333	6,666
40kg	625	2,500	5,000
50kg	500	2,000	4,000
60kg	416	1,666	3,333
70kg	357	1,428	2,857

Liveweight	Doses per pack		
	2.5L	10L	20L
Cattle			
100kg	250	1,000	2,000
300kg	83	333	666
500kg	50	200	400

CAUTION: Do not use in lambs under 20kg liveweight or calves under 50kg liveweight. Do not use with milk or milk-feeders, or while calves are suckling.
